

Yoomi Bottle and Warmer, £22.50, John Lewis
In just one minute, this bottle and warmer heats a feed to the natural temperature of breast milk.

Feeding

If you're going to be bottle feeding while you're out, take enough formula or expressed milk for an emergency supply, just in case you stay out later than planned. This is where travel sterilisers and disposable bottles come in handy. You may also find that your baby likes his milk warm, so a travel bottle warmer is useful.

*HAVE A SAFE JOURNEY

Whether you're nipping to the shops or going on a longer drive, follow these tips:

- Dress your child in clothes suitable for temperatures in the car interior. Keep a spare blanket or wrap handy, too.
- Even babies need to be kept occupied on longer journeys, to minimise distraction to the driver. Take light toys with no sharp edges – travel mobiles are ideal.
